

SISTERS OF HYSTERIA

About

Sisters Of Hysteria are the feminist punk band you've been waiting for. Known for their electric, high-intensity live shows, they've shared stages with rising acts like Bridget — who recently opened for The Smashing Pumpkins — and have become key players in the DIY queer-punk scene, hosting grassroots charity gigs in support of trans healthcare. Unapologetic and outspoken, the band is on a mission to create a space where women and queer people can mosh freely & loudly, without fear of judgement.

Based in London and rapidly expanding their reach with shows in Manchester, Leeds, and Essex, Sisters Of Hysteria are gearing up to release their long-awaited debut EP

"A Serious Proposal To The Ladies." With the seal of approval from celebrated producer and longtime PJ Harvey collaborator Rob Ellis, the band are only at the beginning of a journey you'll wish you'd joined from the ground floor.
